÷	S09.91 Database integrify should be checked		

Analyses are ordered by start time per the local computer running the SQL Diagnostic Manager console, and include:

- Time stamp when the analysis started.
- Total number of recommendations found.
- Highest priority recommendation associated with the analysis.

To select a specific analysis:

- 1. Open the History Browser.
- 2. Select the date from the calendar.
- 3. Select the corresponding analysis from the Historical Snapshots list.

Additional actions

Previous Analysis

Browse to the previous analysis result of your SQL Server instance.

Next Analysis

Browse to the next analysis result of your SQL Server instance.

O To return to Real-Time mode, click Run Analysis or Run Workload Analysis on the Analyze tab.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
