Create a custom report

The Custom Reports wizard allows you to create or edit a custom report. Custom Reports can include any metric collected by SQL Diagnostic Manager. This wizard allows you to choose the counters you want to include in your report, order the way the metrics appear, and specify the aggregation method used on each of your metrics. To open the Custom Reports wizard, click the **New** button in the Custom Report Options tree.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
