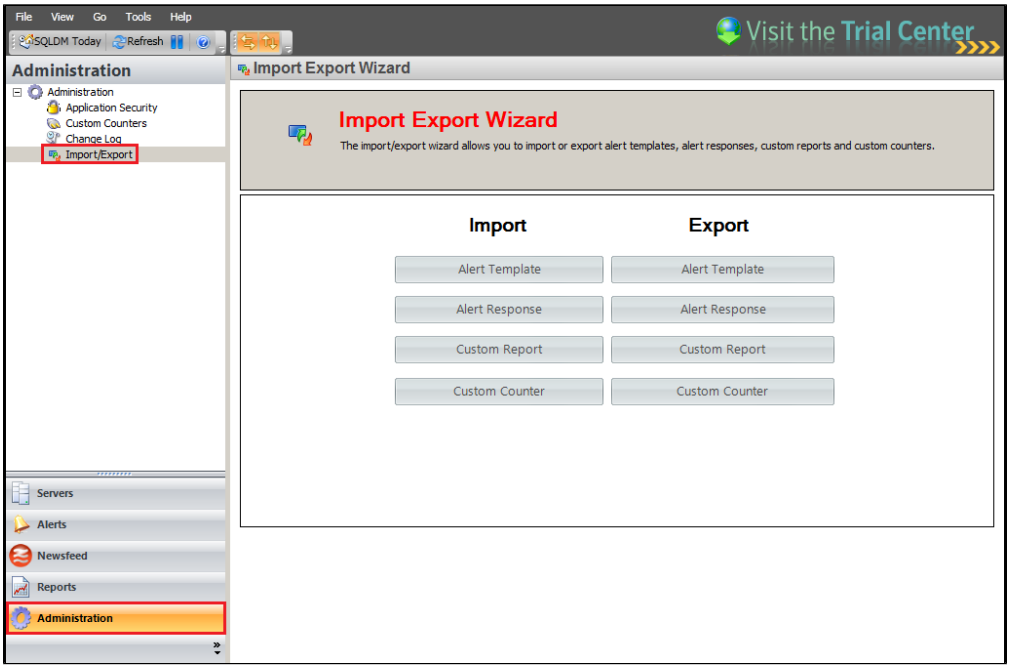
Use the SQL Diagnostic Manager import/export wizard

SQL Diagnostic Manager provides a centralized import/export wizard that allows you to import and share existing XML files. Save time and resources by importing or exporting alert templates, alert responses, custom reports, and custom counters files.

> The import/export wizard is available by default in SQL Diagnostic Manager 10.0 and higher versions.

Access the import/export wizard

To open the import/export wizard, click **Administration > Import/Export** at the navigation pane. Click image to view full size.



Available options in the import/export wizard

Alert Template

Click **Alert Template** in the appropriate column to import or export an alert template.

Alert Response

Select **Alert Response** in the appropriate column to import or export an alert response.

Custom Report

Click **Custom Report** in the appropriate column to import or export a custom report.

Custom Counters

Select **Custom Counter** in the appropriate column to import or export a custom counter.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
