

Availability Group Estimated Recovery time (Seconds) alert

The Availability Group Estimated Recovery time (Seconds) alert provides the required time in seconds that the secondary replica needs to catch up with the primary replica. Alert includes affected databases.

For more information on configuring alerts and setting thresholds, see [Configure alerts](#).

Enable baseline thresholds

To enable alerting when this metric is outside its established baseline, click the **Baseline Thresholds Enabled (as percentage of baseline)** check box in the Alert Configuration window.

Create an alert response bundle

Create an alert response bundle with the Availability Group Estimated Recovery time (Seconds) alert and related alerts. For additional information, see [Create alert response bundles](#).

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
