

Availability Group Redo Rate (KB\sec) alert

The Availability Group Redo Rate (KB\sec) alert provides the rate in KB per second at which log records are redone in the secondary database to complete synchronization. Alert includes affected databases.

For more information on configuring alerts and setting thresholds, see [Configure alerts](#).

Enable baseline thresholds

To enable alerting when this metric is outside its established baseline, click the **Baseline Thresholds Enabled (as percentage of baseline)** check box in the Alert Configuration window.

Create an alert response bundle

Create an alert response bundle with the Availability Group Redo Rate (KB\sec) alert and related alerts. For additional information, see [Create alert response bundles](#).

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
