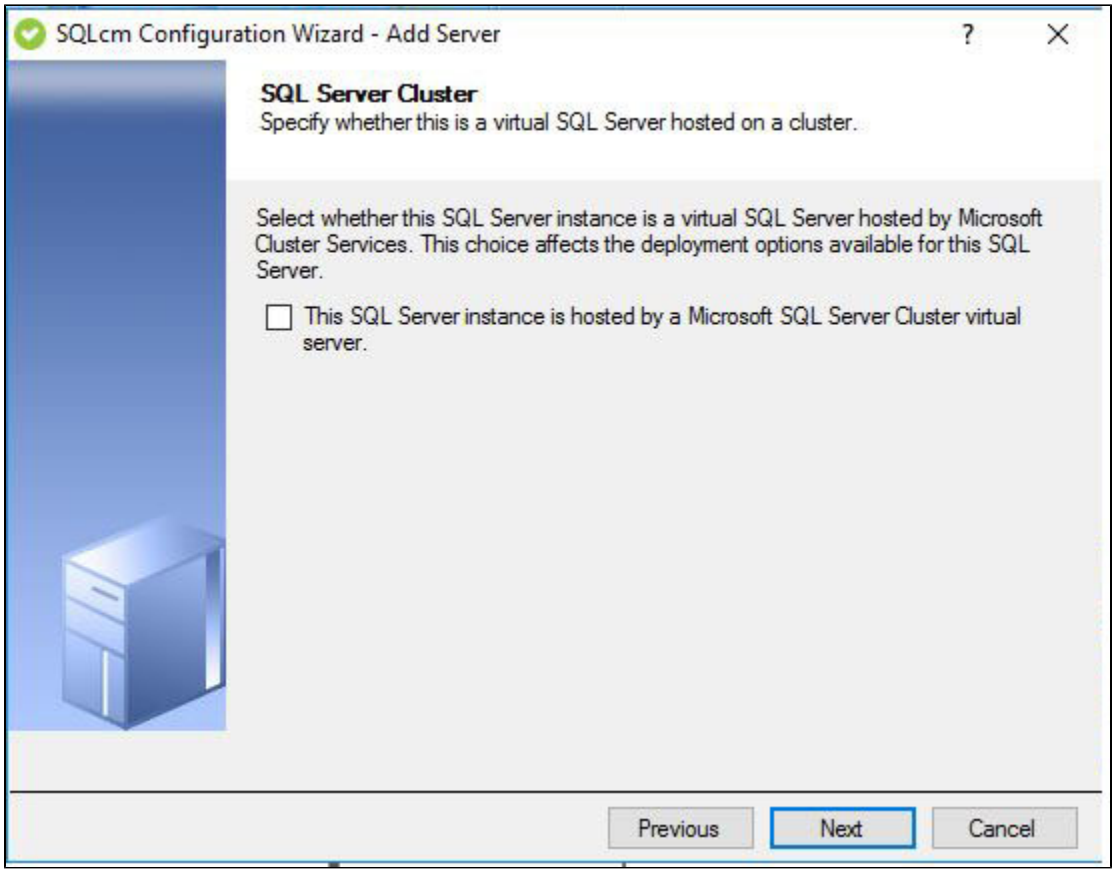
Configuration wizard - SQL Server Cluster window

The SQL Server Cluster window of the Configuration wizard allows you to confirm whether the SQL Server instance you want to audit through IDERA SQL Compliance Manager is hosted by a Microsoft failover cluster (managed through Microsoft Cluster Services). A SQL Server instance running in a cluster is a virtual SQL Server. You can audit server and database events for a virtual SQL Server. Use the Cluster Configuration Console to deploy and configure the SQL Compliance Manager Agent.

If you want to audit events on a virtual SQL Server, select the confirmation checkbox, and then click **Next**.


For more information about installing and configuring the SQL Compliance Manager Agent for a virtual SQL Server, see Audit a virtual SQL Server instance.
