

Deploy SQL Compliance Manager Agent wizard - SQL Compliance Manager Agent Services Account window

The SQL Compliance Manager Agent Services Account window of the Deploy SQL Compliance Manager Agent wizard allows you to specify the credentials of the Windows user account under which the SQL Compliance Manager Agent Service runs. The SQL Compliance Manager Agent Service uses this account to stop and start SQL Server traces, execute stored procedures, manage trace files, and communicate with the Collection Server. Ensure you specify a valid Windows account that has SQL Server System Administrator privileges on the target SQL Server instance.

Type the account name and password, and then click **Next**.
