Using the Restore Wizard

SQL Safe web console allows you to access the **Restore Wizard** from the following sections:

- **Home** tab
- **Instances** tab
- **Databases** tab

When you click the **Restore** option from any of the previous locations, SQL Safe prompts you to choose a restore operation for **Database(s)** or **Object Level Recovery**.

If you want to perform a restore operation for **Database(s)**, the **Restore Wizard** will open with the following sections:

- Target
- Databases
- Backup Sets
- Database Files
- Recovery State
- Restore Type
- Notifications
- Finish

If you want to perform a restore operation for **Object Level Recovery,** click here.

⊘ Take into account that the Restore option is not available for **Guest** role users.

SQL Safe is a high-performance backup and recovery solution for your SQL Servers. Learn more > >
