

CLI Commands

Virtual Database includes a command line interface (CLI). When you use the *sqlvdbcmd* command, the following actions can be performed:

| Actions | Description |
|--|--|
| Create | Create a new virtual database |
| Remove | Delete a virtual database |
| Cleanup | Cleanup unused virtual database temporary files |
| EncryptWindowsPassword | Encrypt plain-text password for Windows logins |
| EncryptSqlPassword | Encrypt plain-text password for SQL Server logins |
| EncryptRestorePassword | Encrypt plain-text password for encrypted restores |
| Map | Generate maps <for InstantRestore or SQL virtual database> |
| Help | Display more detailed help |

For detailed descriptions and available [virtual database options](#), see the CLI Help (`SQLvdbCmd help <action>`).

 SQL VDB CLI actions and options are not case-sensitive.

SQL [Safe](#) is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
