

Encrypt Backup Password CLI Commands

SQL Safe provides you with CLI commands to help you manually encrypt plain-text password for encrypted backups.

To perform EncryptBackupPassword operations use the following command:

- `SQLsafeCmd EncryptBackupPassword <password>`

Where:

Action	Description
<password>	Plain-text password to encrypt.

For detailed descriptions and available options, see the CLI Help (`SQLsafeCmd help EncryptBackupPassword`).

SQL [Safe](#) is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
