

Remove a Virtual Database CLI Commands

SQL Safe provides you with CLI commands to help you manually delete a virtual database.

To delete a virtual database use the following command:

- SQLvdbCmd Remove <db_name> [options]

Where:

Action	Description
<db_name>	Name of the database.

Common Options

The following options help you delete a virtual database:

Options	Descriptions
-InstanceName <name>	<p><name> - SQL server instance name.</p> <p>Note: it is not required if the instance is set as a default on the target server.</p>

For detailed descriptions and available options, see the CLI Help (`SQLvdbCmd help Remove`).

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
