

CLI Commands

Virtual Database includes a command line interface (CLI). When you use the *sqlvdbcmd* command, the following actions can be performed:

Actions	Description
Create	Create a new virtual database
Remove	Delete a virtual database
Cleanup	Cleanup unused virtual database temporary files
EncryptWindowsPassword	Encrypt plain-text password for Windows logins
EncryptSqlPassword	Encrypt plain-text password for SQL Server logins
EncryptRestorePassword	Encrypt plain-text password for encrypted restores
Map	Generate maps <for InstantRestore or SQL virtual database>
Help	Display more detailed help

For detailed descriptions and available [virtual database options](#), see the CLI Help (`SQLvdbCmd help <action>`).

✔ SQL VDB CLI actions and options are not case-sensitive.
