## Install the SQL Safe Backup Agent

You can remotely deploy the SQL Safe Backup Agent from the Management Console to SQL Server instances across your enterprise.

## To install a SQL Safe Backup Agent:

- 1. In the navigation pane, click SQL Safe Agents.
- 2. Right-click on the computer in question in the tree pane.
- 3. Click Install SQL Safe Backup Agent from the context menu.
- 4. Choose whether you want to install the SQL Safe XSP. You can also enable or disable the option for installing SQL Safe Agent Extended Stored Procedures.
- 5. Click OK.
