

Port requirements

To ensure the SQLcompliance Agent and Collection Server can successfully audit instances in your environment, open the following ports. For more information, see [Supported installation scenarios](#).

Environment Type	Port Requirements
Typical	<ul style="list-style-type: none">• Port 5201 on the Collection Server computer• Port 5200 on each computer hosting an audited SQL Server instance
Clustered	<ul style="list-style-type: none">• Port 5201 on the Collection Server computer• Port 5200 on each cluster node hosting a virtual SQL Server you want to audit
Non-trusted	<ul style="list-style-type: none">• Port 5201 on the Collection Server computer• Port 5200 on each computer hosting an audited SQL Server instance in a non-trusted domain or workgroup

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
