Configuration wizard - Regulation Details window

The Regulation Details window of the Configuration wizard displays a table containing all of the regulation guidelines applied to the selected database(s) and what events are affected. You can scroll through the table, sorted by regulation number. If you have more than one set of regulations applied, IDERA SQL Compliance Manager displays each set on a tab for ease of use.

You can access this window by clicking the link available on the SQL Compliance Manager Configuration wizard Summary window.

SQL Compliance Manager audits all activity on your server. Learn more > >
