

# Deploy Reports wizard - SQL Compliance Manager Repository tab

The SQL Compliance Manager Repository tab of the Deploy Reports wizard allows you to specify which Windows user account IDERA SQL Compliance Manager should use to connect to the Repository. You can use the same account that the Collection Service runs under, or you can specify a different account.

Specify the name of the SQL Server instance that hosts the Repository, enter the appropriate account credentials, and then click **Next**.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
