

Understanding user roles

IDERA common framework provides the functionality to add, edit, and delete users and groups while also managing their roles. IDERA SQL Compliance Manager leverages this user role functionality to allow you to easily manage the instance permissions associated with your accounts. For more information about managing users, see [Managing users in the IDERA Dashboard](#).

There are three roles available:

- **Product Administrator.** Full access and control of SQL Compliance Manager.
- **Product User.** Cannot access the Dashboard Administration page, but can perform all job management and instance management actions.
- **Product Guest (Read-Only).** Cannot access the Dashboard Administration page, but can access all other pages in read-only mode. This user cannot perform any job management or instance management actions.

SQL Compliance Manager audits all activity on your server. [Learn more > >](#)
