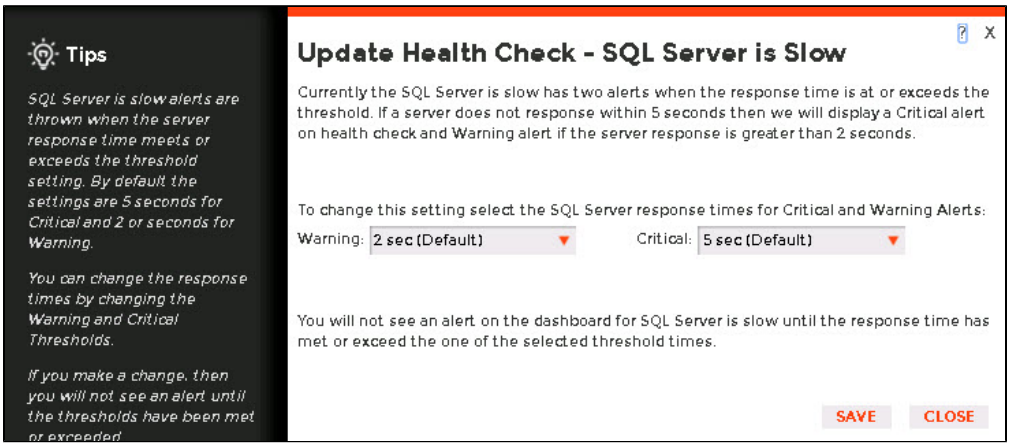
Manage health checks - SQL Server is Slow

The **SQL Server is slow** health check alerts you when the SQL Server response time is slower than the set threshold. Click **Configure** in the Manage Health Checks window, and IDERA SQL Inventory Manager displays the Update Health Check - SQL Server is slow window.

Make the appropriate changes, and then click **Save**.



Available Health Checks

For more information about the Health Checks performed by IDERA SQL Inventory Manager, go to What Health Checks are available with SQL Inventory Manager?.

SQL Inventory Manager lets you discover and visualize your SQL Server environment. Learn more > >
