

Configuring email settings for alert notifications

IDERA SQL Inventory Manager can send email notifications for warning or critical conditions from your environment, but before subscribing to these email notifications; you must first configure your email (SMTP) settings.

You can access this option by going to the **Administration** tab.

The screenshot shows the IDERA SQL Inventory Manager (IM) web interface. The top navigation bar includes the IDERA logo, a user welcome message, and links for LOG OUT and HELP. Below this is a secondary navigation bar with tabs for DASHBOARD, SQLINVENTORYMANAGER(IM), OVERVIEW, EXPLORER, INSTANCES, and ADMINISTRATION. The ADMINISTRATION tab is selected, and a search bar is visible. The main content area is titled 'ADMINISTRATION' and contains several sections: Users, Instances, Alert Emails, MS SQL Server Licensing - Core Factor Tables, Health Checks, Licensing, Tags, Discovery, and Custom Inventory Fields. In the 'Alert Emails' section, the 'Configure email (SMTP) settings' link is highlighted with a red rectangle. Other links in this section include 'Manage Users', 'Add SQL Server Instances', 'Import SQL Servers', 'Subscribe to alerts', and 'Manage Subscriptions For All Users'. The 'Licensing' section has a 'Manage License' link. The 'Tags' section has a 'Manage Tags' link. The 'Discovery' section has links for 'Manage Discovery Options', 'Auto Registration Options', 'Discover Instances', 'Manage Discovery Credentials', and 'Discovery Status'. The 'Custom Inventory Fields' section has a 'Manage Custom Inventory Fields' link.

In the **Alert Emails** section, click **Configure email (SMTP) settings**. A dialog box opens with three main sections:

- Email Information
- Outgoing Mail Server Information
- Test Email Settings

Email Information

Sender Address

Enter the email address that SQL Inventory Manager will use as the sender of the emails notifications.

Reply To Address

You must specify a reply-to email address to receive replies from emails.

Message Footer

Enter the text that you want to appear in the footer of notifications.

Outgoing Mail Server Information

In order to send email notifications, you must specify the settings of an email server you want to use. You need to provide the following information:

SMTP Server Address

Enter the name or Internet Protocol (IP) address of your SMTP mail server.

SMTP Server Port

Enter the IP port that the SMTP mail server uses. The default SMTP port is 25.

Use an SSL encrypted connection

Select this check box to use an SSL encrypted connection to connect to the email server.

SMTP Server authentication

Select this checkbox if your SMTP server requires authentication, specify then a valid user name and password to access the email server.

Test Email Settings

You can use this section to test your email settings. For this purpose, enter the **Recipient of the test email** and click **SEND TEST EMAIL**. SQL Inventory Manager sends a test email to the recipient you specify. You can verify this test email in the respective recipient account.

After you configure your email settings, you can subscribe to alerts. For more information on how to subscribe to alerts, go to [Subscribing to Alerts](#).

 **Manage users**

From the **Administration** tab, you can decide which users receive alerts or not. For more information, refer to [Managing subscriptions for all users](#).

SQL Inventory Manager lets you discover and visualize your SQL Server environment. [Learn more](#) > >
