

How to view Health Recommendations

IDERA SQL Inventory Manager allows you to see health check recommendations from the following views:

- **Overview** - Health check recommendations for all your environment.
- **Instance details** - Health check recommendations for a specific instance.

View Health Check Recommendations from all your monitored environments

On the first top section of the **Overview**, IDERA SQL Inventory Manager gives you a summary of the health check recommendations for all your environment. These health recommendations are grouped by health check category and ordered by criticality; where Level 3 is critical, Level 2 is warning, and Level 1 is informational.

You can click **Show Details** on a recommendation to:

- List those instances or databases affected by the respective health check.
- Individually **Dismiss** or **Refresh** the status of a database or instance.
- View the knowledge base for the health check recommendation.
- Link to more information about the health check recommendation.

If you do not want to see these details, click **Hide Details**.

You can also **Dismiss** or **Refresh** at the level of the whole health check recommendation.

Warning

When you dismiss a health check recommendation, you choose to ignore it temporarily until the health check passes and changes to an alert status, then IDERA SQL Inventory Manager raises again the health check recommendation.

Disabling Health Checks

You can also disable the health check so that IDERA SQL Inventory Manager does not perform it anymore and therefore you no longer receive health recommendations from this health check. For more information about disabling health checks, refer to [Manage Health Checks](#).

The screenshot displays the IDERA SQL Inventory Manager interface. At the top, the user is logged in as 'Simpsons\Administrator'. The main navigation bar includes 'DASHBOARD', 'SQLINVENTORYMANAGER(SIM181)', and tabs for 'OVERVIEW', 'EXPLORER', 'INSTANCES', and 'ADMINISTRATION'. The 'OVERVIEW' tab is active, showing a summary of 910 health check recommendations. The recommendations are categorized by level (Level 3 is critical) and include details such as '6 instance(s) are down', '2 instances are not monitored', 'Monitoring instance AUT-SQL2008R2\SQL2008R2 with limited permissions', '128 databases data files at risk of filling up', and '8 databases log files at risk of filling up'. Each recommendation has a 'Show Details', 'Dismiss', and 'Refresh' button. On the right side, there is a 'MY ENVIRONMENT' section showing statistics for Instances (18), Servers (8), Databases (378), Data Size (16 GB), Log Size (21.8 GB), Disabled Instances (0), and Available Licenses (Unlimited). Below this, there is a 'TAGS' section with various tags like 'Integration', 'Test', 'Business Hours', 'Production', 'Disaster Recovery', 'Development', 'Business Critical', and '24x7'. At the bottom, there are sections for 'TOP DATABASES BY SIZE (MB)' and 'TOP DATABASES BY ACTIVITY (TRANSACTIONS/SEC)'.

Exporting Health Checks Recommendations from the Overview

You can use the exporting option for getting reports from the recommendations displayed on the Overview. On the top right section of the Health Checks Recommendations section, you can find the **Exporting reports** option.

When you access the export option, you have the following three choices:

- **Summary of recommendation categories.** The overview displays a summary of all health check recommendations grouped by categories of recommendations. This option allows you to export this summarized information.
- **Details for all recommendations.** By using this option, you can export a report that includes all available health check recommendations in detail.
- **Details for selected categories.** With this option, you can select those categories of health check recommendations that you want to export. For example, you can choose to have a report for all databases that do not have a backup or for all the instances that are not monitored.

Export Health Check Recommendations

Select the type of data to export

☒ Summary of recommendation categories
☐ Details for all recommendations
☐ Details for selected categories

☐ 2 Instance(s) are down.
☐ 3 Instances are not monitored.
☐ Monitoring Instance AUT-SQL2008R2\SQL2008R2 may be Impaired
☐ 15 databases data files at risk of filling up.
☐ 5 databases log files at risk of filling up.
☐ 7 volumes at risk of filling up.
☐ 268 databases do not have a backup.
☐ 25 databases do not have a current backup.
☐ 4 database(s) have not been checked with DBCC CHECKDB recently.
☐ 35 database(s) are not in a usable state.

Export as

☒ PDF ☐ XLS ☐ XML

View Health Check Recommendations from a specific instance

When you go to an instance details view (For more information, go to [Viewing instance details](#)), you can find a report of the health check recommendations for this specific instance. These health check recommendations are grouped by health check category and ordered by level of criticality; where Level 3 is critical, Level 2 is warning, and Level 1 is informational.

You can click **Show Details** to:

- List databases affected by the health check.
- Individually **Dismiss** or **Refresh** the status of a database.
- View the knowledge base for the health check recommendation.
- Link to more information about the health check recommendation.

If you do not want to see these details, click **Hide Details**.

You can also **Dismiss** or **Refresh** at the level of the whole health check recommendation.

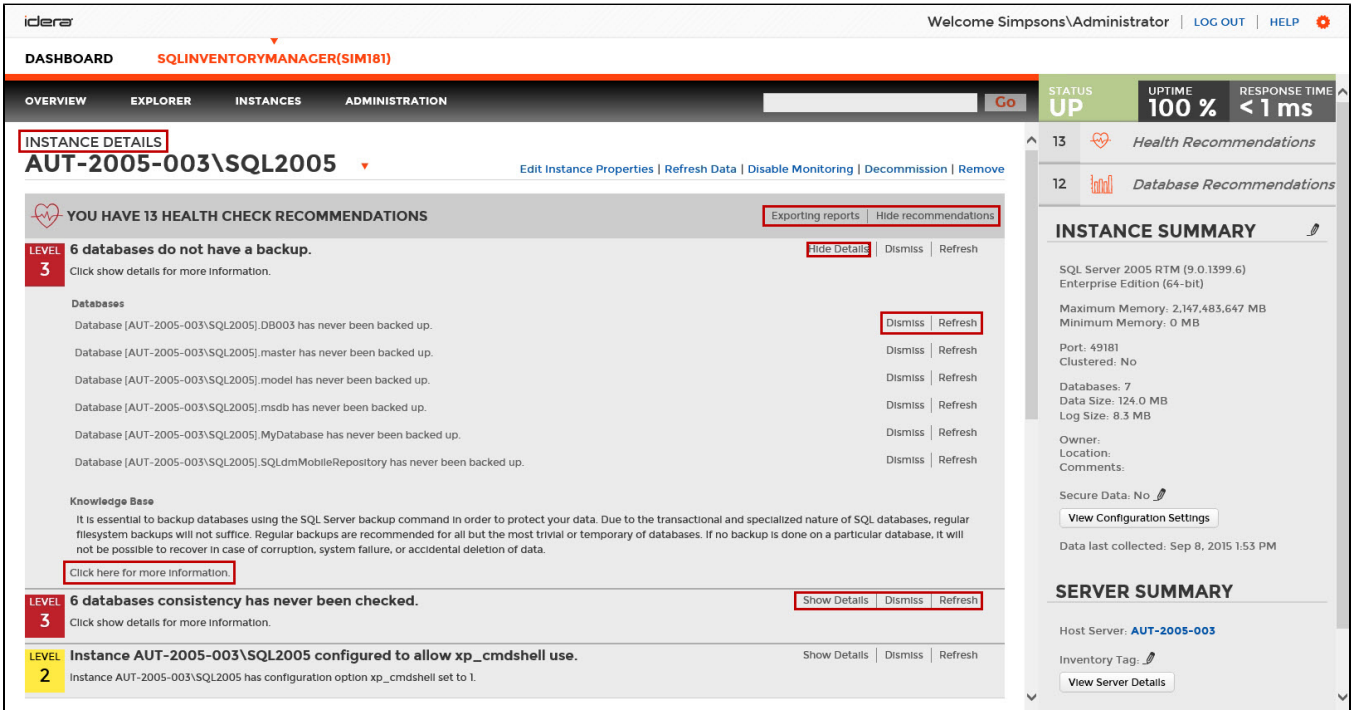

Warning

When you dismiss a health check recommendation, you choose to ignore it temporarily until the health check passes and changes to an alert status, then IDERA SQL Inventory Manager raises again the health check recommendation.

Disabling Health Checks

You can also disable the health check so that IDERA SQL Inventory Manager does not perform it anymore and therefore you no longer receive health recommendations from this health check. For more information about disabling health checks, refer to [Manage Health Checks](#).

The screenshot displays the IDERA SQL Inventory Manager interface. At the top, the user is logged in as 'Simpsons\Administrator'. The main navigation bar includes 'DASHBOARD', 'OVERVIEW', 'EXPLORER', 'INSTANCES', and 'ADMINISTRATION'. The current view is 'INSTANCE DETAILS' for 'AUT-2005-003\SQL2005'. The interface shows a status bar with 'STATUS UP', 'UPTIME 100%', and 'RESPONSE TIME < 1 ms'. Below this, there are sections for 'Health Recommendations' and 'Database Recommendations'. The 'Health Recommendations' section lists several issues, including '6 databases do not have a backup' and '6 databases consistency has never been checked'. Each recommendation has a 'Show Details', 'Dismiss', and 'Refresh' button. The 'Database Recommendations' section shows 'Instance AUT-2005-003\SQL2005 configured to allow xp_cmdshell use'. On the right side, there are summary sections for 'INSTANCE SUMMARY' and 'SERVER SUMMARY'.

Info

If you have no health check recommendations or if you dismiss all of them, you get the message: **This instance is passing all health checks.**

Exporting Health Checks Recommendations from an instance

You can also export Health Checks Recommendations from an instance by clicking **Exporting reports** on the action items options of the Health Check Recommendations section.

When you access the export option you have the following three choices for exporting recommendations:

- **Summary of recommendation categories.** The Overview displays a summary of all health checks recommendations grouped by categories of recommendations. This option allows you to export this summarized information.
- **Details for all recommendations.** By using this option, you can export a report that includes all available health check recommendations in detail.
- **Details for selected categories.** With this option you can select those categories of health check recommendations you want to export. For example, you can choose to have a report for all databases that do not have a backup or for all the instances that are not monitored.

Choose the format for exporting, IDERA SQL Inventory Manager allows you export as **PDF, XLS or XML**. Click **Export**.
