IDERA SQL Schema Compare command line

IDERA SQL Schema Compare command line allows you to compare and synchronize database schema via the command line. With the command line you can:

- Perform automated schema comparison and synchronization;
- Compare and synchronize database schema as part of your setup and deployment solution;
- Compare database schemas and execute the synchronization scripts in batch files;
- Schedule the comparison.

All command line settings are specified in an xml config file. You can create an xml config file via one of the following methods:

- **Using the SQL Schema Compare command line wizard**. You can access the wizard from the start menu, under **Start > All Programs > IDERA > SQL Server comparison tools > Command Lines**.
- **Using the SQL Schema Compare interface**. Simply compare the databases for which you wish to create a command line config file, set the options and other comparison preferences and click **Create a command line config file** in the Ribbon, context menu or in the right panel.
- **Manually, using any text editor, such as Notepad**.

The command line comes with samples for most typical data comparison scenarios. The sample configuration files are located under **\Program Files\Idera\SQL comparison toolset\Command Line Samples\Schema Compare**.
